

Please read this manual carefully before use and keep it properly for future reference. Failure to follow this manual may affect children's safety.

- Be vigilant against open flames or other strong heat sources, approaching the crib!
 - During use, regular inspections should be conducted. If replacement is required, please contact sales personnel to request replacement parts. Do not use non manufacturer replacement parts.
 - If the crib has loose or damaged joints, please do not use the crib!
 - Do not leave the baby unattended!
 - Do not place this product near the window as the curtain line may entangle the baby!
 - To avoid suffocation, keep the data cover away from the baby!
 - The maximum carrying capacity of the crib beside the baby bed is 30KG!
 - Please do not place items exceeding 3KG in the storage basket!
 - Four brake devices must be pressed when the crib is parked!
 - When cleaning the fabric cover, please use a brush or other cleaning tools to clean it thoroughly, avoiding machine washing.
 - Applicable age: 0-24 months!
- Executive standard: GB30004-2013

Multifunctional splicing crib

Only when the baby is soundly asleep can the mother sleep with peace of mind

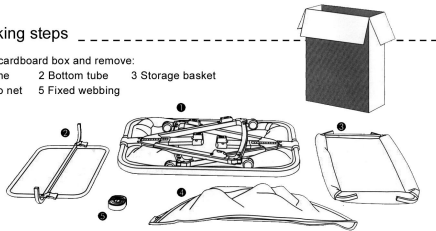

- The illustrations used in this manual are to illustrate the product operation method and structure. In case of slight differences between the actual product and the diagram, please refer to the actual product.

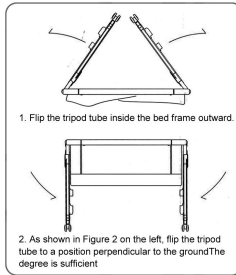

Unpacking steps

Open the cardboard box and remove:

- 1 Bed frame 2 Bottom tube 3 Storage basket
4 Mosquito net 5 Fixed webbing

Unfold the bed frame

1. Flip the tripod tube inside the bed frame outward.

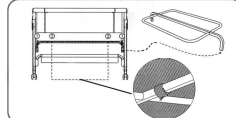

2. As shown in Figure 2 on the left, flip the tripod tube to a position perpendicular to the ground. The degree is sufficient.

Install storage basket

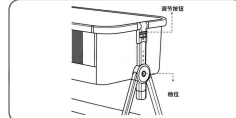

As shown in the right figure, insert the storage baskets into the corresponding holes below the tripod tube until a "click" sound is heard indicating that the installation is in place.

Install storage basket

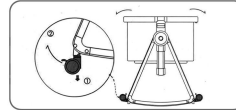

1. Place the two feet of the bottom tube separately into the holes on the inner side of the height adjustment rod until a "click" sound is heard, indicating that the installation is in place.
2. After installing the bottom tube, it is necessary to buckle the fixing buckles on both sides of the bed bottom onto the rod in the middle of the bottom tube.

Dispatch regulation

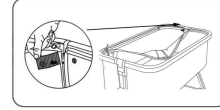

1. Press the adjustment button to adjust the height of the 0th gear, with the same adjustment method on both sides.
2. The circular hole in the middle of the tripod tube can display gear numbers.

Cradle Mode

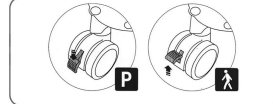

Pull the universal wheels of the four legs of the crib side bed down and then flip them up to switch to cradle mode.

Remove the cloth cover

1. Open the zipper head protective cover.
2. Pull the zipper along the top of the bed frame to remove the fabric cover.

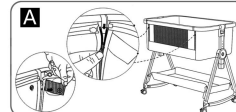

Baby Bedside Brake

Press the brake device on the four universal wheels of the crib side bed, and the crib side bed is in a braking state. Lift the brake device of the four universal wheels on the crib side bed, and the crib side bed is in an active state.

WARN : Four brake devices must be pressed when the crib is parked!

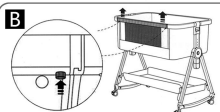

Splice King Bed

- Open the side zipper: as shown in Figure A
1. Open the zipper head protective cover.
 2. Open the two zippers at the side frame opening.

- When using a fixed strap, it needs to be at the same height as the bed board.
- As shown in Figure C:
1. place the crib beside the bed in a suitable position and apply the brakes on all four wheels.
 2. Adjust the height to be level with the king bed.

- Open the side border: as shown in Figure B
1. Simultaneously press the disassembly button below both ends of the border.
 2. Lift the border up and flip it outward and downward.
 3. After flipping down the frame, fasten the fixed webbing on the bottom of the bed to the corresponding button on the frame to complete.
